

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1           **Claim 1    (Currently amended):**    A foldable mobile  
2       communication terminal comprising:

3           an upper case including a control processing section,  
4       a display, a RF communication section, an I/O connector  
5       section and a vibrator section of which corresponding  
6       function blocks are mounted on a hard board; and

7           a lower case including a key operation section and a  
8       battery of which corresponding function blocks are mounted  
9       on a key board,

10           wherein the key board arranged and accommodated in the  
11       lower case is a flexible board,

12           wherein a battery terminal, a microphone, a key  
13       diaphragm, and a LED for keys are all mounted on portions  
14       of one surface of the flexible board and said portions are  
15       folded or turned down before storing in the lower case.

1           **Claim 2    (Previously presented):**    A foldable mobile  
2       communication terminal according to claim 1,

3           wherein the display arranged and accommodated in the  
4       upper case comprises a liquid crystal display,

5           wherein a menu selecting section for selecting a menu

6 by navigating through a menu system displayed on the  
7 display is disposed in the vicinity of a lower side of the  
8 display.

1 Claim 3 (Currently amended): A foldable mobile  
2 communication terminal according to claim 1,

3 ~~wherein the key board arranged and accommodated in the~~  
4 ~~lower case is a flexible board,~~

5 wherein said the flexible board shares its use as a  
6 connecting board for connecting the upper case and the  
7 lower case.

Claim 4 (Canceled)

1 Claim 5 (Previously presented): A foldable mobile  
2 communication terminal according to claim 1, wherein a  
3 microphone section is mounted in an inclined state on a  
4 lower side of the lower case at a position close to a  
5 speaker's mouth so as to receive a sound from the speaker  
6 directly while in use.

1 Claim 6 (Previously presented): A foldable mobile  
2 communication terminal according to claim 1, wherein a view  
3 port is provided on the lower case whereby displayed  
4 contents on the display can be seen in a folded state.

1           **Claim 7 (Previously presented):** A foldable mobile  
2           communication terminal according to claim 6, wherein the  
3           view port is disposed between the microphone and the key  
4           operation section.

1           **Claim 8 (Original):** A foldable mobile communication  
2           terminal according to claim 6 or claim 7, wherein a  
3           transparent plate is mounted on the view port.

1           **Claim 9 (Original):** A foldable mobile communication  
2           terminal according to claim 8, wherein the transparent  
3           plate is given a lens function.

1           **Claim 10 (Previously presented):** A foldable  
2           communication terminal according to claim 1, wherein a  
3           portion of the upper case and the lower case in the  
4           vicinity of a section being mechanically connected with  
5           respect to each other is formed in a narrower configuration  
6           than a remaining portion.

1           **Claim 11 (Currently amended):** A foldable mobile  
2           communication terminal comprising:  
3           an upper case including a control processing section,  
4           a display, and a RF communication section of which

5 corresponding function blocks are mounted on ~~the~~ a hard  
6 board; and

7 a lower case including a key operation section, a I/O  
8 connector, and a vibrator and the battery of which  
9 corresponding function blocks are mounted on a key board,

10 wherein a flexible board is used as the key board  
11 arranged and accommodated in the lower case,

12 wherein a battery terminal, a microphone, a key  
13 diaphragm, and a LED for keys are all mounted on a same  
14 surface of the flexible board and folded or turned down  
15 before storing in the lower case.

1 **Claim 12 (Currently amended):** A foldable mobile  
2 communication terminal according to claim 11,

3 ~~wherein a flexible board is used as the key board~~  
4 ~~arranged and accommodated in the lower case,~~

5 wherein the flexible board shares its use as a  
6 connecting board connecting the upper case and the lower  
7 case.

**Claim 13 (Canceled)**

1 **Claim 14 (Previously presented):** A foldable mobile  
2 communication terminal according to claim 11, wherein a  
3 portion of the upper case and the lower case near a section  
4 being mechanically connected with respect to each other

5       formed in a narrower configuration than a remaining  
6       portion.

Claims 15 through 18 (Canceled)
